

# C-Eye<sup>®</sup> Tip & related products

Supported by:

Ophthalmology

Anterior Segment (Cornea)

Disease (Infections)  
**SOA Medication**

Dystrophy (Keratoconus)  
**SOA CXL & Corneal transplantation**

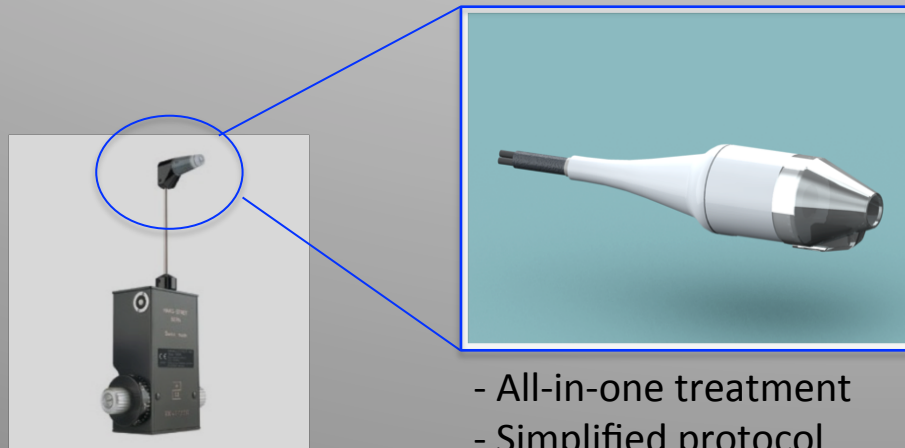

## Problems (SOA)

- 1) Quickly identify underlying pathogen
- 2) Time-consuming and expensive
- 3) Antibiotic resistance

## Problems (SOA)

- 1) Invasive (corneal transplantation)
- 2) Difficult 7-step protocol
- 3) Expensive infrastructure

## Proposed Solution

Patent application no: US 61/480,443  
(priority filing date: 29.04.2011)

- All-in-one treatment
- Simplified protocol

## Unique Selling Points

- 1) Safety Mechanism
- 2) Disposable tip (consumable)
